For Immediate Release

COAGULANT CONTROL

The Streaming Current Meter is a coagulant dose control instrument designed for water treatment industry. The instrument measures ionic and colloidal charge to determine how well the process is performing. Process upsets are prevented with alarm outputs. Custom algorithms are used to control the optimum coagulant dosage. Coagulant dosing is controlled via a 4-20 mA control signal. Benefits include low maintenance patented sensor design and average coagulant savings of 20-35%.
